Water Genius!

Zilver Sensor Tap

Item Code : **ZY8155**

Basic information:

No Touch Automatic Sensor Taps/ Mixers incorporate state-of-the-art design and technology to provide the ultimate in convenience. In addition, they offer the added benefit of improved hygiene by eliminating the need to physically touch the fixture to turn the water on or off. This eliminates the chance of re-contaminating one's hands by touching the same handle that was previously touched by not only your own unwashed hands, but also those of every user who came before you. Sensor taps/ Mixer are very simple to operate. The sensor detects hand movements and turns the tap on for use, then turns it off after no movement is detected for a specific amount of time. Whether you are unsure as to which style of automatic tap will best complement your existing design or are in the process of designing your facility from the ground up, our expert customer service personnel are available to help you.
